## Helping People From Around The World

Did you know the IBS Treatment Center has helped people from not only the USA, but from all over the world put IBS behind them? (Pun intended.)

From Canada to Curaçao, New Zealand to Norway, Thailand to Turkey, and each of the United States (except South Dakota, strangely enough), people just like you have come to the IBS Treatment Center and found a cure.

#### Why us?

Because we're different. Our doctors and support staff understand what you are going through and are empathetic to how IBS affects your day-to-day choices. We know you want to be in control of your life again and we have an arsenal of knowledge and experience to draw upon to make that happen for you.

Our secret is that ALL we do is treat IBS. It's a vast condition with many causes and symptoms, and it affects everyone differently. We dive deep into the root of your problem and work with you to find a unique solution that is specific to your needs, because we know your IBS is not the same as anyone else's.

Although your General Practitioner is well-intended and will certainly offer advice on how to control your IBS, he or she is at a major disadvantage when it comes to actually ridding you of IBS altogether. You see, your GP treats patients with all sorts of conditions and illnesses, so he or she must have a broad knowledge of many different ailments.

In contrast, our sole goal is to rid you of your IBS. Our knowledge is deeply specialized in this one focus. That's what makes us different. That's what makes us the better choice if you want to find a cure that will work for YOU.

## Helping People From Around The World *cont.*

The IBS Treatment Center fills a niche that the healthcare industry has largely ignored. We offer testing that is not available anywhere else and even gastroenterologists can't do what we can. No one else specializes in only IBS. I'm not talking about just in America; I mean we are unique from a worldwide standpoint. I know, I know... It sounds like too big of a claim to be true! Trust me, I have been wondering for years now why we are the only team of IBS specialists when so many people from every corner of the planet are affected by it. I honestly wish there were more help out there because suffering is awful—and unnecessary. I know because I once had IBS, too.

**"Our success is unmatched by any other clinic in the world."** ~ Dr. Stephen Wangen

### How do we treat a patient who lives in Lebanon when we're located on the Pacific Coast?

Solving IBS is a detective process and it takes more than one consult, but only the first visit needs to be in person at our clinic. You can return home after the initial visit and the rest of your consults can be done over the phone or through Skype. Most patients improve significantly within 3-4 consults. We understand traveling can be difficult for IBS patients, however, anyone we have cured will tell you it's worth it. You can return home after the initial visit and the rest of your consults can be done over the phone or through Skype. Most patients improve significantly within 3-4 consults.

If you live outside of the USA, please contact us to discuss alternatives for accessing our care. It's easier than you think! Your initial consult really can change your life for the better, forever. Soon you'll be rediscovering all of the wonderful things you used to do, like traveling for pleasure and getting outdoors for boating, hiking, skiing, or sipping on a salt-rimmed glass at Margaritaville.

Please contact us for more information and let us help you feel better sooner. And you in South Dakota—what are you waiting for?

“

My 18 year old daughter suffered for approximately 2 years with severe abdominal pain. After countless trips to emergency rooms... our daughter has NONE of the symptoms that she was previously living with. Our thanks and appreciation for the kind care and concern provide by the IBS Treatment Center.

~ Brad

“

I am a 58 year old woman suffering with IBS since the age of 15. THIS PLACE HAS CHANGED MY LIFE!

~ Puzsik

”

“

When I think back to how miserable my life was before and how limited I was in considering future plans, I get a bit emotional... It's truly been a transformation.

~ Susan

”

## Suggestions from Becky, Our Nutritionist

Here we are again enjoying sunshine and warm weather! During this time, the advice from your doctor at the IBS Treatment Center to stay hydrated becomes more important than ever.

You might be saying “Ugh, water is tasteless and now you want me to drink more?” Yes! But why does it have to be tasteless? Take it from this nutritionist that even water can taste good. Try adding some fruit or herbs to a pitcher of water in the fridge to bring some excitement to those taste buds. Or possibly try out a tea in your water bottle. One of my favorites is adding a bag of delicious Honey or Vanilla Rooibos tea to my water bottle. This can also be a great time to check out your local tea shops for something fun and new. Let’s turn the chore of hydrating into a summer of tasty, fun flavors!
